**Step 1:**

Create the navigation menu seen here.

1. The menu should fill the width of the viewport.
2. Each menu item should be equally spaced to fill the viewport.
3. For font, use https://fonts.google.com/specimen/Roboto.

Step 2:

When the top level menu item is hovered, show the dropdown menu.

1. There should be two separate lists within the dropdown.
2. Each list should take up an equal amount of space.

Step 3:

When the viewport width is less than 1024px, create an "off canvas" menu.

1. The navigation menu should be moved out of view.
2. A "hamburger" icon should be visible in place of the menu. (Use any icon font set for this or create with CSS).
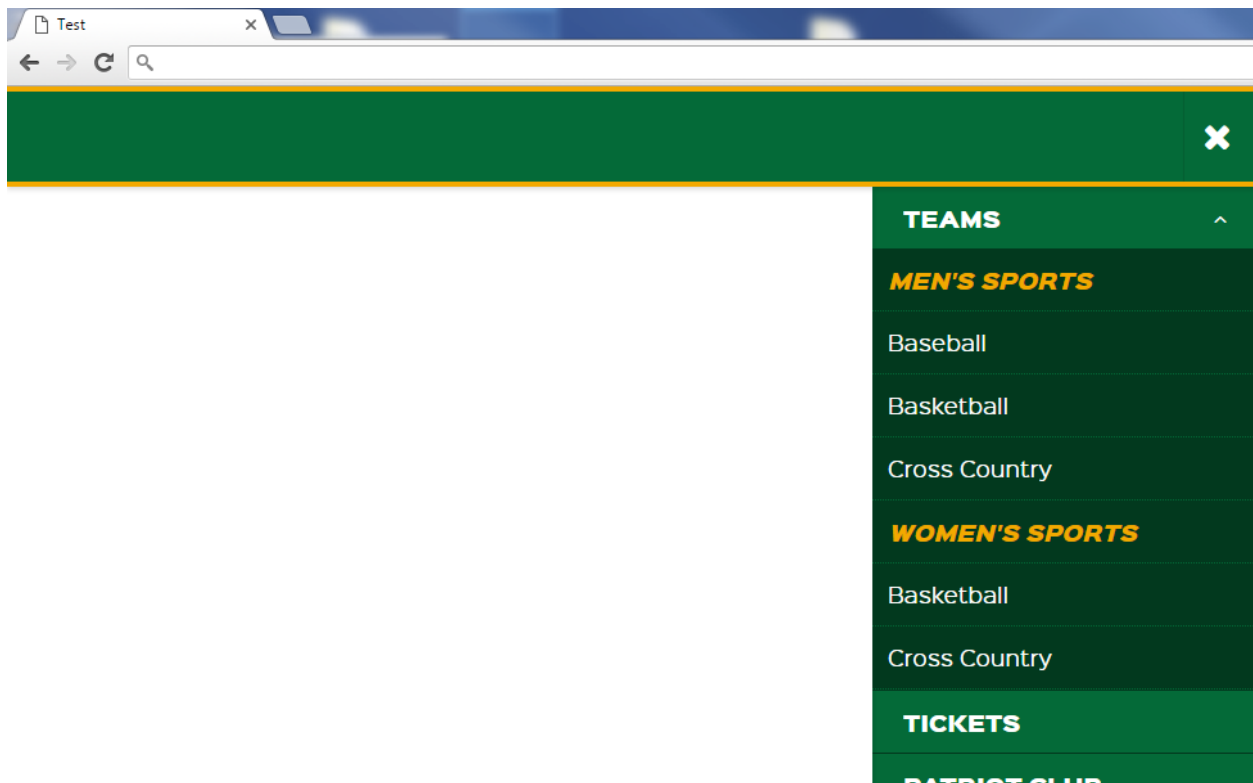

Step 4:

Open the "off canvas" menu.

1. When the icon is clicked, the menu should "slide" into view.
2. The menu should take up the full height of the viewport, minus the height of the header.

Step 5:

Open the top level navigation item.

1. When the top level navigation item is clicked, the submenu should appear.
